

Doom PWAD QA Report

Run 345d6706-acbf-49fc-87e1-a3825c702a00 | Map E1M1 | Outcome error

Executive Summary

Document the automated agentic QA run, combine static map analysis with live play telemetry, and give map authors concrete evidence about completion, traversal, combat, and defects.

Pass/fail:

map_completion: FAIL

agent_survival: PASS

runtime_status: failed

outcome: error

evidence_quality: LIMITED

The QA pipeline failed before producing a complete gameplay verdict: 2 validation errors for call[strafe_and_shoot] object_id Missing required argument [type=missing_argument, input_value={'enemy_id': 0}, input_type=dict] For further information visit https://errors.pydantic.dev/2.13/v/missing_argument enemy_id Unexpected keyword argument [type=unexpected_keyword_argument, input_value=0, input_type=int] For further information visit https://errors.pydantic.dev/2.13/v/unexpected_keyword_argument.

Test Item And Environment

Test item: E1M1 from WAD ac683d7a-65e6-4b06-b94f-b7c0cf8961af. Static analysis context: 10 things, 8 enemies, 1 items, 0 keys, 0 secret sectors, 35 linedefs, 5 sectors, estimated difficulty hard.

The run used IWAD freedoom1, difficulty 3, model gemini-2.5-flash-lite, and a maximum budget of 100 game ticks.

Metric	Value	Metric	Value
Status	failed	Duration	16
Actions	1	LLM calls	2
Final HP	100	Kills	0
Position samples	1	Movement units	0.0
Recording	/media/steven/MaD/matznysh-hna/Agentic-PWAD-QA-Doom/Backend/storage/recordings/345d6706-acbf-49fc-87e1-a3825c702a00.mp4		

Static Analysis Context

Things	Enemies	Items	Keys	Secrets	Linedefs	Sectors
10	8	1	0	0	35	5

Estimated difficulty: hard. Health ratio: 0.0000. Ammo ratio: 0.0000.

Coverage Evaluation

The agent recorded 1 decision events, 1 movement samples, 1 position cluster(s), and 0.0 map units of movement. ended with outcome 'error'.

Objectives Covered

- **Map launch and initial state capture:** Run status: failed.
- **Agent decision logging:** 1 decision event(s) recorded.
- **Movement telemetry:** 1 position sample(s) across 1 cluster(s).
- **Gameplay recording:** /media/steven/MaD/matznysh-hna/Agentic-PWAD-QA-Doom/Backend/storage/recordings/345d6706-acbf-49fc-87e1-a3825c702a00.mp4

Objectives Omitted

- **Verified map exit:** Run outcome was error.
- **Broad spatial coverage:** The agent did not visit at least three coarse map areas.

Uncovered attributes: exit reliability, secret accessibility, full-map traversal depth

Defects And Risks

No defects were detected. Primary risk: the automation pipeline could not complete this run.

Patterns: No repeated defect pattern was identified.

No defects are currently attached to this run.

Risk Areas

- **Pipeline reliability:** 2 validation errors for call[stafe_and_shoot] object_id Missing required argument [type=missing_argument, input_value={'enemy_id': 0}, input_type=dict] For further information visit https://errors.pydantic.dev/2.13/v/missing_argument enemy_id Unexpected keyword argument [type=unexpected_keyword_argument, input_value=0, input_type=int] For further information visit https://errors.pydantic.dev/2.13/v/unexpected_keyword_argument
- **Progression:** Map exit was not verified; outcome was error.
- **Traversal coverage:** The agent visited too few coarse position clusters.

Activity Log Summary

The pipeline statically analyzed the map, launched a ViZDoom MCP session, executed 1 agent action(s), collected event and position telemetry, finalized recording artifacts, detected defects, and generated this report.

Run data is sparse; treat gameplay conclusions as preliminary.

No non-normal gameplay events were recorded.

Limitations And Recommendations

Telemetry volume was too low for strong spatial conclusions. The run ended in a pipeline error, so gameplay coverage is incomplete. Automated play can miss secrets or optional combat paths that require map-specific intent. Single-run results should be confirmed with additional seeds or manual review before release decisions.

Good Quality Areas

- **Evidence capture:** A gameplay recording artifact was produced.
- **Static context:** The report includes parsed map structure and thing counts.
