

Doom PWAD QA Report

Run 4d6cfc57-ad36-47e1-8d8e-2d575e04ede0 | Map E1M1 | Outcome error

Executive Summary

This is an autonomous QA test of map E1M1 using an LLM agent designed to validate map navigation, combat balance, and resource distribution. The test run resulted in an error due to a connection loss, preventing any data collection from the gameplay simulation.

Pass/fail:

map_navigation: FAIL

combat_engagement: FAIL

resource_balance: FAIL

secret_coverage: FAIL

overall_verdict: FAIL

navigation_rationale: Navigation failed because the simulation environment did not start.

combat_rationale: Combat failed because the simulation environment did not start.

resource_rationale: Resource balance failed because the simulation environment did not start.

secret_rationale: Secret coverage failed because the simulation environment did not start.

A critical technical failure occurred where the connection to the ViZDoom environment was closed before the test commenced. No LLM calls were made and no agent actions were taken, resulting in a zero-tick execution.

Test Item And Environment

The test targeted map E1M1 using the Freedoom1 IWAD on difficulty level 3. The map contains 102 enemies, 138 items, 3 keys, 16 weapons, and 7 secret sectors across a 2048x2560 unit area. Static analysis indicates a high-complexity 'slaughter' style map with significant monster density.

The test environment utilized ViZDoom as the game engine, governed by the gemini-3.1-flash-lite LLM model via an MCP tool interface. The run was configured with a max_ticks cap of 500.

Metric	Value	Metric	Value
Status	failed	Duration	None
Actions	0	LLM calls	0
Final HP	None	Kills	None
Position samples	0	Movement units	0.0
Recording	Not produced		

Static Analysis Context

Things	Enemies	Items	Keys	Secrets	Linedefs	Sectors
310	102	138	3	7	2742	420

Estimated difficulty: slaughter. Health ratio: 0.0662. Ammo ratio: 0.0811.

Coverage Evaluation

The coverage is 0%. No sectors were explored, no enemies were engaged, and no secrets were identified. The test run provided no usable data for a QA evaluation of the map's quality.

Objectives Covered

- **Map launch and initial state capture:** Run status: failed.
- **Agent decision logging:** 0 decision event(s) recorded.

Objectives Omitted

- :
- :
- :
- :
- :

Uncovered attributes: All map features, including navigation, combat logic, and trigger mechanisms, remain untested due to the technical failure.

Defects And Risks

No defects were detected because the test run failed to initialize. The system returned an error status rather than gameplay data.

Patterns: Insufficient defects to identify patterns.

No defects are currently attached to this run.

Risk Areas

- **System Infrastructure:** high

Activity Log Summary

The test consisted only of the static analysis phase; the simulation never commenced.

The intended exploration and combat phases were entirely skipped due to the error status.

No non-normal gameplay events were recorded.

Limitations And Recommendations

The agent was unable to test any aspect of the map due to the connection error.

Good Quality Areas

- N/A:
