

Doom PWAD QA Report

Run d65c3380-fa1d-4e76-bbc1-5df137504b1a | Map E1M1 | Outcome timeout

Executive Summary

This is an autonomous QA test of E1M1 using an LLM agent designed to validate map navigation, combat engagement, and resource distribution. The test resulted in a timeout after 7 seconds, failing to reach the map exit or engage any enemies.

Pass/fail:

map_navigation: FAIL

combat_engagement: FAIL

resource_balance: FAIL

secret_coverage: PASS

overall_verdict: FAIL

navigation_rationale: The agent timed out at the spawn point without achieving movement to 3 distinct position clusters.

combat_rationale: The agent achieved 0 kills against 8 enemies, failing the 0.5 kill/enemy ratio requirement.

resource_rationale: The agent flagged a critical resource deficit defect, and health/ammo ratios are both 0.0.

secret_rationale: The map contains 0 secret sectors, fulfilling the pass criteria by default.

No technical problems encountered during this test run. The agent successfully reported an immediate issue regarding resource starvation.

Test Item And Environment

The test evaluated the E1M1 map on the Freedoom1 IWAD at difficulty level 5. The map contains 8 enemies (Imps, Zombiemen, and a Shotgun Guy), 0 keys, and 0 secret sectors across a 2528x1056 unit area. Static complexity is high due to the significant concentration of hitscanner enemies relative to available resources.

The test was conducted using ViZDoom as the game engine, with the gemini-3.1-flash-lite LLM model orchestrating actions via the MCP tool interface. The run was configured for difficulty level 5 with a strict max_ticks cap of 20.

Metric	Value	Metric	Value
Status	completed	Duration	7
Actions	1	LLM calls	1
Final HP	100	Kills	0
Position samples	6	Movement units	187.6
Recording	/media/steven/MaD/matznysh-hna/Agentic-PWAD-QA-Doom/Backend/storage/recordings/d65c3380-fa1d-4e76-bbc1-5df137504b1a.mp4		

Static Analysis Context

Things	Enemies	Items	Keys	Secrets	Linedefs	Sectors
--------	---------	-------	------	---------	----------	---------

10	8	1	0	0	35	5
----	---	---	---	---	----	---

Estimated difficulty: hard. Health ratio: 0.0000. Ammo ratio: 0.0000.

Coverage Evaluation

Coverage was minimal as the agent stopped immediately upon identifying a critical resource imbalance. Less than 5% of the map sectors were explored, and zero enemies were engaged. The result is sufficient to classify the map as currently unplayable.

Objectives Covered

- :

Objectives Omitted

- :
- :
- :
- :

Uncovered attributes: The agent was unable to test map geometry, verticality, or door functionality because the run terminated at the spawn point.

Defects And Risks

A single defect was detected during this run, classified as Severity 2 (Major). The most impactful issue is the total lack of starting resources (ammo/weapons) relative to the enemy count, which blocks all progression.

Patterns: Insufficient defects to identify patterns.

Severity	Priority	Type	Tick	Description
2	2	agent_observed	0	Agent-observed issue [RESOURCE BALANCE] At tick 0, position (-32.0, -224.0): Initial spawn lacks starting ammo (bullets/shells) and the map provides no items. Player impact: progression impossible as all enemies are currently invincible. Severity: critical.

Risk Areas

- **Player Spawn Point (-32.0, -224.0):** high

Activity Log Summary

1) Static analysis phase (Pre-run), 2) Map exploration phase (Started at tick 0), 3) Defect detection phase (Tick 0), 4) Report generation phase (Post-timeout).

The combat phase was completely absent because the agent determined the map state rendered the player invulnerable to engagement due to the lack of offensive resources.

No non-normal gameplay events were recorded.

Limitations And Recommendations

The agent was unable to reach any locked doors, triggers, or specific map geometry due to the immediate resource starvation at spawn.

Good Quality Areas

- **Agent Logic:**
