

Doom PWAD QA Report

Run 4d6cfc57-ad36-47e1-8d8e-2d575e04ede0 | Map E1M1 | Outcome error

Executive Summary

This is an autonomous QA test of map E1M1 using an LLM agent, designed to validate gameplay navigation, combat balance, and resource distribution. The test resulted in a failure due to an unrecoverable connection error, preventing any gameplay execution or data collection.

Pass/fail:

map_navigation: FAIL

combat_engagement: FAIL

resource_balance: FAIL

secret_coverage: FAIL

overall_verdict: FAIL

navigation_rationale: The agent could not enter the map due to a connection failure.

combat_rationale: No combat was possible as the simulation failed to initialize.

resource_rationale: No resource data was collected due to session failure.

secret_rationale: No secrets were tested as the simulation failed to initialize.

The test run failed to initialize properly, resulting in a 'Connection closed' error immediately upon start. Zero LLM calls and zero actions were recorded, indicating a failure in the communication pipeline between the agent and the ViZDoom environment.

Test Item And Environment

The test targeted map E1M1 using the Freedoom1 IWAD on difficulty level 3. The map contains 102 enemies (including a variety of Imps, Cacodemons, and a Baron of Hell), 138 items, 3 keys, and 7 secret sectors across 420 sectors. The map geometry is complex, with a density of 2742 linedefs within a 2048x2560 unit area.

The test environment utilized the ViZDoom engine controlled by a Python-based agent interface and the gemini-3.1-flash-lite model via MCP. The test was configured with a max_ticks cap of 500.

Metric	Value	Metric	Value
Status	failed	Duration	None
Actions	0	LLM calls	0
Final HP	None	Kills	None
Position samples	0	Movement units	0.0
Recording	Not produced		

Static Analysis Context

Things	Enemies	Items	Keys	Secrets	Linedefs	Sectors
--------	---------	-------	------	---------	----------	---------

310	102	138	3	7	2742	420
-----	-----	-----	---	---	------	-----

Estimated difficulty: slaughter. Health ratio: 0.0662. Ammo ratio: 0.0811.

Coverage Evaluation

Test coverage is 0%. No sectors were explored, no enemies were engaged, and no game state data was captured, rendering the results insufficient for a meaningful QA analysis.

Objectives Covered

- **Map launch and initial state capture:** Run status: failed.
- **Agent decision logging:** 0 decision event(s) recorded.

Objectives Omitted

- :

Uncovered attributes: The agent could not test any map features, including navigation, combat mechanics, scripting, or geometry, due to the total failure of the test run.

Defects And Risks

No defects were detected during this test run because the game engine failed to start. The 'Connection closed' error prevented the collection of telemetry required for defect analysis.

Patterns: Insufficient defects to identify patterns.

No defects are currently attached to this run.

Risk Areas

- **Pipeline reliability:** Connection closed
- **Progression:** Map exit was not verified; outcome was error.
- **Traversal coverage:** The agent visited too few coarse position clusters.

Activity Log Summary

The test was aborted during the initialization phase before any gameplay phases could occur. No tick data exists to provide a timeline.

The simulation terminated before any gameplay-related activities could be initiated.

No non-normal gameplay events were recorded.

Limitations And Recommendations

The agent was unable to test any part of the map due to a catastrophic connection error at runtime.

Good Quality Areas

- **Static context:** The report includes parsed map structure and thing counts.
