

Doom PWAD QA Report

Run d65c3380-fa1d-4e76-bbc1-5df137504b1a | Map E1M1 | Outcome timeout

Executive Summary

This is an autonomous QA test of E1M1 using an LLM agent designed to validate map navigation, combat engagement, and resource distribution. The test resulted in a timeout due to an inability to progress, as the agent detected an insurmountable resource deficit.

Pass/fail:

map_navigation: FAIL

combat_engagement: FAIL

resource_balance: FAIL

secret_coverage: PASS

overall_verdict: FAIL

navigation_rationale: The agent could not navigate the map as it was softlocked at the spawn point.

combat_rationale: The agent had 0 kills and could not engage enemies due to a lack of resources.

resource_rationale: The resource_balance failed due to an absolute lack of starting ammo and health items.

secret_rationale: Secret_coverage passed because there were 0 secret sectors in the map.

No technical problems encountered during this test run; the agent successfully initialized and reported the identified map-design defect.

Test Item And Environment

The test evaluated the E1M1 map on Freedoom1 using a 'hard' difficulty setting. The map contains 8 enemies (Imps, Zombiemen, and Shotgun Guys), 1 armor item, 0 keys, and 0 secret sectors, within a layout of 35 linedefs and 5 sectors. The static analysis indicates a high-threat environment with significant hitscanner density.

The test was conducted using the ViZDoom engine interface with a gemini-3.1-flash-lite LLM agent. The run was constrained to a maximum of 20 ticks to assess initial spawn conditions and early gameplay progression.

Metric	Value	Metric	Value
Status	completed	Duration	7
Actions	1	LLM calls	1
Final HP	100	Kills	0
Position samples	6	Movement units	187.6
Recording	/media/steven/MaD/matznysh-hna/Agentic-PWAD-QA-Doom/Backend/storage/recordings/d65c3380-fa1d-4e76-bbc1-5df137504b1a.mp4		

Static Analysis Context

Things	Enemies	Items	Keys	Secrets	Linedefs	Sectors
--------	---------	-------	------	---------	----------	---------

10	8	1	0	0	35	5
----	---	---	---	---	----	---

Estimated difficulty: hard. Health ratio: 0.0000. Ammo ratio: 0.0000.

Coverage Evaluation

Coverage was minimal, as the agent was unable to leave the spawn vicinity. Only 2 position clusters were identified, and 0% of the map was explored. The results are sufficient to indicate a critical progression-blocking defect.

Objectives Covered

- :

Objectives Omitted

- :
- :
- :
- :

Uncovered attributes: The agent was unable to test map-specific scripting, sector interactions, or combat balance due to the immediate resource-based softlock at the player spawn point.

Defects And Risks

A total of 1 defect was identified, classified as a Severity 2 (Major/Critical impact) issue. The most impactful defect is the total lack of starting weaponry and ammunition, rendering the map impossible to progress.

Patterns: Insufficient defects to identify patterns.

Severity	Priority	Type	Tick	Description
2	2	agent_observed	0	Agent-observed issue [RESOURCE BALANCE] At tick 0, position (-32.0, -224.0): Initial spawn lacks starting ammo (bullets/shells) and the map provides no items. Player impact: progression impossible as all enemies are currently invincible. Severity: critical.

Risk Areas

- **Player Spawn (-32.0, -224.0):** high

Activity Log Summary

1) Static analysis phase (Pre-run), 2) Map exploration phase (Ticks 0-0), 3) Defect detection phase (Tick 0), 4) Report generation phase.

Exploration was effectively non-existent as the agent entered an immediate termination state upon identifying the resource-based softlock.

No non-normal gameplay events were recorded.

Limitations And Recommendations

The agent was unable to test any doors, lifts, or switches as it never reached them.

Good Quality Areas

- **None:**
