

Doom PWAD QA Report

Run e1ef960d-1eac-4bff-9130-9269f4887578 | Map E1M1 | Outcome pwad_crash

Executive Summary

Document that the PWAD crashed or failed to initialize under the configured ViZDoom/Freedom test environment. This is a valid QA outcome: the product captured the failure as structured run, defect, and report evidence instead of dropping the test.

Pass/fail: map_navigation: FAIL combat_engagement: LIMITED resource_balance: LIMITED secret_coverage: LIMITED
overall_verdict: FAIL

- The map did not initialize into a playable episode.
- No spawned combat state was available.
- Resource balance cannot be evaluated before runtime initialization.
- Secret coverage cannot be evaluated before runtime initialization.

PWAD crashed or failed to initialize under the configured ViZDoom/Freedom test environment.

Test Item And Environment

Test item: E1M1 from WAD a2c3fe65-0427-4d17-b88c-0c3fbaf9f1ed. Static analysis context: 310 things, 102 enemies, 138 items, 3 keys, 7 secret sectors, 2742 linedefs, 420 sectors, estimated difficulty slaughter.

The run used IWAD freedom1, difficulty 1, model gemini-3.1-flash-lite, and a maximum budget of 900 game ticks. Failure stage: startup.

Metric	Value	Metric	Value
Status	failed	Duration	None
Actions	0	LLM calls	0
Final HP	None	Kills	None
Position samples	0	Movement units	0.0
Recording	Not produced		

Recording And Agent Quality

Recording	Value	Agent progress	Value
Status	expected_missing	Progress score	0
Frames	0 total / 0 unique	Meaningful progress	0
Video shape	? x ? @ 15.0 FPS	Completed objects	0
Gameplay time	?s, 0 tic(s)	Quality flags	warning

Quality warnings: No recording is expected because gameplay did not initialize.

No recording is expected because gameplay did not initialize.

Static Analysis Context

Metric	Raw WAD	Difficulty 1	Notes
Enemies	102	63	39 hidden by skill/multiplayer flags

Items	138	133	5 hidden by skill/multiplayer flags
Secrets	7	7	Sector special 9
Geometry	2742 linedefs	420 sectors	2048 x 2560 units

Selected-difficulty estimate: hard. Health ratio: 0.0952. Ammo ratio: 0.1207.

Coverage Evaluation

Coverage is limited to upload, static analysis if available, runtime launch/preflight, error capture, defect creation, and report generation. No combat, traversal, item, or secret conclusions should be drawn.

Objectives Covered

- **Runtime failure capture:** Map E1M1 could not be loaded safely by ViZDoom (preflight timed out after 15s).
- **Report artifact:** A crash report JSON/PDF was generated.
- **Defect payload:** 2 defect(s) attached to the run.

Objectives Omitted

- **Gameplay traversal:** The PWAD did not initialize into a playable episode.
- **Combat/resource coverage:** No gameplay state was available after startup failure.
- **Video artifact:** No recording is expected when gameplay never initializes.

Uncovered attributes: Traversal, combat, resource balance, secrets, and progression were not exercised.

Defects And Risks

A PWAD crash/initialization defect was recorded. Review the raw diagnostic and validate required IWAD, map markers, resources, and compatibility settings.

Patterns: difficulty_spawn_mismatch: 1; pwad_crash: 1

Severity	Priority	Type	Tick	Description
1	1	pwad_crash	0	PWAD crashed or failed to initialize PWAD crashed or failed to initialize under the configured ViZDoom/Freedoom test environment.
3	2	difficulty_spawn_mismatch	0	Difficulty-specific thing flags hide map content At difficulty 1, 39 of 102 enemies and 5 of 138 items from raw static analysis do not spawn in single-player because of Doom skill or multiplayer flags.

Risk Areas

- **Runtime compatibility:** Map E1M1 could not be loaded safely by ViZDoom (preflight timed out after 15s).
- **Release readiness:** Players may be unable to launch this PWAD in the tested setup.

Activity Log Summary

The backend validated the run request, attempted to launch E1M1, captured the runtime failure, stored a defect, and generated this crash report.

Trace events: 0. Position samples: 0. Zero gameplay samples are expected for startup crashes.

Limitations And Recommendations

This report does not judge map balance or playability beyond runtime initialization. A successful runtime launch is required before gameplay quality can be evaluated.

Good Quality Areas

- **Failure evidence:** The backend preserved the crash as structured QA output.
- **Static context:** Static map analysis is included when available.
