

Doom PWAD QA Report

Run e79c154e-80c3-4b85-861a-786ffd7738b6 | Map MAP01 | Outcome stuck

Executive Summary

Document the automated PWAD QA run, combine static map analysis with live play telemetry, and give map authors concrete evidence about completion, traversal, combat, and defects. The selected-difficulty gameplay evidence uses 12 spawned enemy/enemies.

Pass/fail: map_navigation: FAIL combat_engagement: FAIL resource_balance: FAIL secret_coverage: FAIL
overall_verdict: FAIL

- The run ended with outcome 'stuck' after visiting 18 coarse position cluster(s).
- 1 kill(s) recorded against 12 enemy/enemies that spawn at difficulty 1.
- Selected-difficulty health_ratio=0.0000, ammo_ratio=0.0833.
- 0 secret(s) found.

The highest-severity open finding is 'Run stalled after repeated stuck decisions' at severity 1. Review this before publishing the map.

Test Item And Environment

Test item: MAP01 from WAD b8a466fd-b557-44cd-a08e-a97206f6f2c0. Static analysis context: 108 things, 12 enemies, 12 items, 0 keys, 4 secret sectors, 208 linedefs, 30 sectors, estimated difficulty hard. At difficulty 1, 12 of 12 raw enemies spawn.

The run used IWAD freedoom2, difficulty 1, model gemini-3.1-flash-lite, and a maximum budget of 900 game ticks.

Coverage Evaluation

The automated playthrough recorded 33 gameplay event(s), 33 lockstep LLM/MCP decision(s), 486 movement samples, 18 position cluster(s), and 5293.9 map units of movement. The run ended with outcome 'stuck'. Combat coverage is evaluated against 12 enemy/enemies that spawn at difficulty 1, not against hidden raw THINGS. Recording quality status: ok; 202 frames, 190 unique frames, 13.467 seconds at 15.0 FPS. Automated playthrough progress score: 24 with 5 meaningful progress event(s). Quality flags: warning.

Objectives Covered

- **Map launch and initial state capture:** Run status: completed.
- **Director decision logging:** 33 decision event(s) recorded.
- **Movement telemetry:** 486 position sample(s) across 18 cluster(s).
- **Gameplay recording:** /media/steven/MaD/matznysh-hna/Agentic-PWAD-QA-Doom/Backend/storage/recordings/e79c154e-80c3-4b85-861a-786ffd7738b6.mp4

Objectives Omitted

- **Verified map exit:** Run outcome was stuck.

Uncovered attributes: exit reliability, secret accessibility

Defects And Risks

2 defect(s) were detected. Primary risk: at least one detected defect needs author review.

Patterns: softlock_navigation: 1; unreachable_secret: 1

Severity	Priority	Type	Tick	Description
1	1	softlock_navigation	415	Run stalled after repeated stuck decisions The run produced repeated stuck events with no meaningful progress. This usually indicates blocked navigation, unreachable objectives, or an automated control loop that should be reviewed with the recording and action trace.
3	3	unreachable_secret	483	Secrets not reached Static analysis found secret sectors, but the automated playthrough did not enter one.

Risk Areas

- **Progression:** Map exit was not verified; outcome was stuck.
- **softlock_navigation:** Run stalled after repeated stuck decisions
- **unreachable_secret:** Secrets not reached

Activity Log Summary

The pipeline statically analyzed the map, launched a ViZDoom MCP session, executed 33 lockstep MCP action(s), collected event and position telemetry, finalized recording artifacts, detected defects, and generated this report.

Run data is sparse or quality flags are present; treat gameplay conclusions as preliminary.

Limitations And Recommendations

Automated play can miss secrets or optional combat paths that require map-specific intent. Single-run results should be confirmed with additional seeds or manual review before release decisions.

Good Quality Areas

- **Runtime stability:** The backend completed the run lifecycle.
- **Telemetry:** The run includes multiple position samples.
- **Evidence capture:** A gameplay recording artifact was produced.
- **Static context:** The report includes parsed map structure and thing counts.

Gemini API key is not configured; using deterministic fallback. Visible Chainsaw selected for collection.

#6 | ticks 221 -> 241 | tool move_to | stop arrived

Gemini API key is not configured; using deterministic fallback. Visible ShellBox selected for collection.

#7 | ticks 242 -> 321 | tool explore | stop max_ticks

Gemini API key is not configured; using deterministic fallback. No visible combat or pickup target is available, so a short bounded exploration step starts.

#8 | ticks 322 -> 401 | tool explore | stop max_ticks

Gemini API key is not configured; using deterministic fallback. No visible combat or pickup target is available, so a short bounded exploration step starts.

#9 | ticks 402 -> 404 | tool take_action | stop tics_complete

Gemini API key is not configured; using deterministic fallback. Recent exploration did not progress, so probing a nearby door/use interaction.

#10 | ticks 405 -> 407 | tool take_action | stop tics_complete

Gemini API key is not configured; using deterministic fallback. Recent exploration did not progress, so probing a nearby door/use interaction.

#11 | ticks 408 -> 410 | tool take_action | stop tics_complete

#12 | ticks 411 -> 413 | tool take_action | stop tics_complete

Gemini API key is not configured; using deterministic fallback. Recent exploration did not progress, so probing a nearby door/use interaction.

#13 | ticks 414 -> 415 | tool take_action | stop tics_complete

The requested action repeats a recent no-progress signature (take_action), so I am switching tactics. I am facing a fresh unexplored direction first, then I will move in short bounded steps.

#14 | ticks 416 -> 420 | tool take_action | stop tics_complete

Progress has not changed across repeated lockstep decisions, so I am forcing a bounded QA recovery probe. I am advancing straight under direct control instead of letting explore arc in place.

#15 | ticks 421 -> 423 | tool take_action | stop tics_complete

The requested action repeats a recent no-progress signature (take_action), so I am switching tactics. I am probing for a switch or door interaction before declaring the area blocked.

#16 | ticks 424 -> 451 | tool retreat | stop complete

The requested action repeats a recent no-progress signature (take_action), so I am switching tactics. The direct probes did not progress yet, so I am retreating and rotating out of the loop.

#17 | ticks 452 -> 453 | tool aim_and_shoot | stop out_of_ammo

Gemini API key is not configured; using deterministic fallback. Visible DoomImp selected for combat.

#18 | ticks 454 -> 455 | tool explore | stop enemy_spotted

Target 7 was recently rejected as not visible, so I am exploring instead of firing through geometry.

#19 | ticks 456 -> 457 | tool explore | stop enemy_spotted

Target 7 was recently rejected as not visible, so I am exploring instead of firing through geometry.

#20 | ticks 458 -> 459 | tool explore | stop enemy_spotted

Target 7 was recently rejected as not visible, so I am exploring instead of firing through geometry.

#22 | ticks 462 -> 463 | tool move_to | stop enemy_nearby

The requested action repeats a recent no-progress signature (explore), so I am switching tactics. I am switching to available pickup Chainsaw first.

#23 | ticks 464 -> 465 | tool explore | stop enemy_spotted

Target 7 was recently rejected as not visible, so I am exploring instead of firing through geometry.

#24 | ticks 466 -> 467 | tool explore | stop enemy_spotted

Target 7 was recently rejected as not visible, so I am exploring instead of firing through geometry.

#27 | ticks 472 -> 473 | tool take_action | stop tics_complete

Target 7 was recently rejected as not visible, so I am exploring instead of firing through geometry.

#31 | ticks 480 -> 481 | tool explore | stop enemy_spotted

Target 7 was recently rejected as not visible, so I am exploring instead of firing through geometry.

#32 | ticks 482 -> 483 | tool take_action | stop tics_complete

The requested action repeats a recent no-progress signature (explore), so I am switching tactics. I am facing a fresh unexplored direction first, then I will move in short bounded steps.
