

Doom PWAD QA Report

Purpose

Automated QA report for a Doom PWAD test run.

Summary

Map E1M1 was tested by an autonomous agent.

Environment

IWAD freedoom1, model gemini-2.5-flash.

Defects

1 defects were detected.

- 2 - Agent-observed issue: {'coordinates': 'N/A', 'visible_symptom': 'Map starts with 0 total enemies, 0 secrets, 0 health pickups, and a rocket launcher with 50 rockets.', 'likely_player_impact': 'Lack of enemies, health, and secrets makes the map trivial to 'beat' in terms of survival or challenge. The starting weapon is highly excessive for an empty map, suggesting an imbalance or an unfinished state. This significantly limits the scope of playtesting to only navigation and geometry issues, as combat balance and resource management cannot be tested.', 'qa_type': 'design_observation'}
