

Doom PWAD QA Report

Run 309f2b19-d286-4e1f-9bfa-87970fe26ade | Map E1M2 | Outcome timeout

Executive Summary

This is an autonomous QA test of map E1M2 using an LLM-directed test harness. The test was designed to validate navigation and environmental coverage, resulting in a timeout outcome over a duration of 9 seconds.

Pass/fail:

map_navigation: FAIL

combat_engagement: PASS

resource_balance: PASS

secret_coverage: PASS

overall_verdict: PARTIAL

- The automated playthrough did not reach 3 distinct position clusters as the session ended at tick 17.
- Spawned_enemy_count is 0, satisfying the pass criteria.
- Spawned_enemy_count is 0, satisfying the pass criteria.
- Secret_sector_count is 0, satisfying the pass criteria.

No technical problems encountered during this test run.

Test Item And Environment

The test evaluated map E1M2 using the Freedoom1 IWAD at difficulty level 3. The map consists of 164 linedefs and 92 sectors within a 112x112 unit area. Static analysis confirms the map is entirely devoid of enemies, items, weapons, keys, and secret sectors.

The test environment utilized ViZDoom as the game engine, with the gemini-3.1-flash-lite LLM model coordinating through the MCP interface. The test was conducted at difficulty level 3 with a max_ticks cap of 260.

Coverage Evaluation

Coverage was insufficient for a meaningful QA result as the automated playthrough did not move from the spawn point. With 92 sectors available and zero exploration conducted, the map geometry remains unverified. No combat or secret discovery objectives were applicable due to the map being empty.

Objectives Covered

- **Map launch and initial state capture:** Run status: completed.
- **Director decision logging:** 2 decision event(s) recorded.
- **Movement telemetry:** 2 position sample(s) across 1 cluster(s).
- **Gameplay recording:** /media/steven/MaD/matznysh-hna/Agentic-PWAD-QA-Doom/Backend/storage/recordings/309f2b19-d286-4e1f-9bfa-87970fe26ade.mp4

Objectives Omitted

- **Navigate the entire map:** Navigation did not occur due to premature episode termination at tick 17.
- **Engage all enemy types encountered:** No enemies present in static analysis.
- **Find secrets where accessible:** No secret sectors present in static analysis.
- **Stress-test geometry, doors, lifts, and switches:** Automated playthrough remained stationary.
- **Document resource balance issues:** No resources present in static analysis.

Uncovered attributes: The automated playthrough could not test any map-specific scripting, geometry traversability, or functional line/sector interactions due to the immediate termination of the test episode.

Defects And Risks

No defects were detected during this test run. The map passed all automated checks.

Patterns: Insufficient defects to identify patterns.

No defects are currently attached to this run.

Risk Areas

- **Spawn point:** medium The test runtime terminated immediately upon initialization, preventing validation of the map contents.

Activity Log Summary

1) Static analysis phase (pre-run), 2) Map exploration phase (ticks 16-17), 3) Report generation phase. Combat and defect detection phases were not reached.

Exploration was effectively nullified by the immediate termination of the test episode.

Limitations And Recommendations

The automated playthrough did not test any map features as it remained stationary at the spawn point.

Good Quality Areas

- **None:** No areas were traversed or interacted with.
