

Doom PWAD QA Report

Run 4b6351d5-e8e6-4a54-b330-9107a7a93b4d | Map E1M1 | Outcome timeout

Executive Summary

This is an autonomous QA test of E1M1 using an LLM-directed test harness. The test was designed to evaluate map navigation, combat engagement, and resource distribution, resulting in a test timeout after 5 seconds of execution.

Pass/fail:

map_navigation: FAIL

combat_engagement: PASS

resource_balance: PASS

secret_coverage: PASS

overall_verdict: FAIL

- The run ended with outcome 'timeout' after visiting 2 coarse position cluster(s).
- 0 kill(s) recorded against 0 enemy/enemies that spawn at difficulty 3.
- Selected-difficulty health_ratio=0.0000, ammo_ratio=0.0000.
- No secret sectors exist in static analysis.

No technical problems encountered during this test run.

Test Item And Environment

The test evaluated map E1M1 using the Freedoom1 IWAD at difficulty level 3. The map contains 50 sectors, 235 linedefs, and measures 1568x1504 units. Static analysis indicates a high level of simplicity, containing no enemies, items, keys, or secrets.

The test environment utilized ViZDoom as the game engine, with gemini-3.1-flash-lite as the LLM model and the MCP tool interface for decision-making. The difficulty was set to 3 with a 180-tick maximum duration.

Metric	Value	Metric	Value
Status	completed	Duration	5

Selected-difficulty estimate: easy. Health ratio: 0.0. Ammo ratio: 0.0.

Coverage Evaluation

Coverage was limited to the initial spawn area and surrounding geometry. Due to the lack of enemies and items in this map, the automated playthrough provided a sufficient check of basic navigation, though broader progression testing was not possible.

Objectives Covered

- **Navigate the map:**

Objectives Omitted

- **Engage all enemy types encountered:** 0 enemies present in map static analysis
- **Find secrets where accessible:** 0 secret sectors in map static analysis
- **Document resource balance issues:** 0 resources present in map static analysis

Uncovered attributes: The automated playthrough could not test map-specific scripting, multi-stage progression, or interactive geometry features due to the empty nature of the map layout.

Defects And Risks

No defects were detected during this test run. The map passed all automated checks.

Patterns: Insufficient defects to identify patterns.

No defects are currently attached to this run.

Risk Areas

- **Progression:** Map exit was not verified; outcome was timeout.
- **Traversal coverage:** The automated playthrough visited too few coarse position clusters.

Activity Log Summary

1) Static analysis phase (pre-run), 2) Map exploration phase (Ticks 17-18), 3) Report generation phase.

The episode finished prematurely at tick 18, preventing full map exploration.

Limitations And Recommendations

No significant test limitations identified.

Good Quality Areas

- **Spawn geometry:** The automated playthrough successfully initialized and moved within the environment without navigation errors.
