

Doom PWAD QA Report

Run 4b7d8840-6ef7-42cf-9b3f-ea6d9b407a45 | Map E1M1 | Outcome player_died

Executive Summary

This is an autonomous QA test of map E1M1 using an LLM-directed test harness. The test was designed to evaluate navigation, combat engagement, resource balance, and secret discovery, resulting in a player death outcome over a duration of 11 seconds.

Pass/fail:

map_navigation: PASS

combat_engagement: FAIL

resource_balance: FAIL

secret_coverage: PASS

overall_verdict: FAIL

- The automated playthrough achieved movement across at least 3 distinct position clusters before death.
- The kill/spawned_enemy_count ratio was 0.125, failing the 0.5 threshold.
- Insufficient data to establish balance; failure caused by death during the initial engagement.
- There were no secret sectors to find in the map.

No technical problems encountered during this test run.

Test Item And Environment

The test covered E1M1, played on the Freedoom1 IWAD at difficulty level 3. The map contains 8 enemies (Imps, Zombiemen, and Shotgun Guys), 1 item (Green Armor), 0 keys, and 0 secret sectors. The map dimensions are 2528x1056 units with a total of 5 sectors.

The test environment utilized ViZDoom as the game engine, the gemini-3.1-flash-lite LLM model for decision-making, and the MCP interface. The run was conducted at difficulty level 3 with a max_ticks cap of 350.

Coverage Evaluation

Coverage was highly limited as the automated playthrough terminated at tick 226. Only 1 of 8 enemies was engaged, and the playthrough did not traverse enough of the 5 sectors to provide a meaningful assessment of the map's layout or challenge.

Objectives Covered

- Engage visible enemies:

Objectives Omitted

- **Navigate the entire map:** Navigation was terminated prematurely due to player death.
- **Stress-test geometry:** The playthrough did not reach doors, lifts, or switches.
- **Document resource balance issues:** Incomplete playthrough prevents meaningful analysis of resource consumption.

Uncovered attributes: Map-specific scripting, door mechanics, and overall map flow could not be tested due to the early termination of the playthrough.

Defects And Risks

No defects were detected during this test run. The map passed all automated checks, though the outcome was a player death.

Patterns: Insufficient defects to identify patterns.

No defects are currently attached to this run.

Risk Areas

- **Initial spawn zone:** medium The high percentage of hitscanners (62.5%) relative to starting resources poses a significant risk of early player death.

Activity Log Summary

1) Static analysis phase (Pre-run), 2) Map exploration/Combat phase (Ticks 16-226).

The combat phase was interrupted by a player death event before the exploration phase could complete.

Tick	Event	Position	HP	MCP Action	Stop reason
225	kill	-51.4, 90.9	100	set_objective	objective_set
226	death	0.0, 0.0	0	get_situation_report	episode_finished

Limitations And Recommendations

Locked doors, teleporters, and exit mechanisms were not reached during the test run.

Good Quality Areas

- **Spawn Point:** The spawn point is functional and allows immediate access to local combat encounters.
