

Doom PWAD QA Report

Run 66a67d2c-3093-4914-975c-efd8e5695068 | Map E1M1 | Outcome error

Executive Summary

This is an autonomous QA test of E1M1 using an LLM agent, designed to evaluate map navigation, combat balance, and overall playability. The test failed to initiate as the map could not be loaded by the ViZDoom engine, resulting in an error and zero progress.

Pass/fail:

map_navigation: FAIL

combat_engagement: FAIL

resource_balance: FAIL

secret_coverage: FAIL

overall_verdict: FAIL

- The map failed to load into the engine, preventing any movement.
- The map failed to load, preventing any combat engagement.
- The map failed to load, preventing any interaction with resources.
- The map failed to load, preventing any secret discovery.

The test encountered a critical failure: ViZDoom failed to load the map within the 15-second preflight window, resulting in an 'error' outcome.

Test Item And Environment

The test target was map E1M1 using the Freedoom1 IWAD at difficulty level 1. The map contains 420 sectors, 2742 linedefs, and a total of 102 enemies (63 spawning at skill 1) and 138 items. The map complexity is categorized as 'hard' with 7 secret sectors and 3 keys present.

The test environment utilized ViZDoom, controlled by the gemini-3.1-flash-lite LLM model via an MCP tool interface. The planned execution cap was 500 ticks.

Metric	Value	Metric	Value
Status	failed	Duration	None
Actions	0	LLM calls	0
Final HP	None	Kills	None
Position samples	0	Movement units	0.0
Recording	Not produced		

Static Analysis Context

Metric	Raw WAD	Difficulty 1	Notes
Enemies	102	63	39 hidden by skill/multiplayer flags
Items	138	133	5 hidden by skill/multiplayer flags
Secrets	7	7	Sector special 9
Geometry	2742 linedefs	420 sectors	2048 x 2560 units

Selected-difficulty estimate: hard. Health ratio: 0.0952. Ammo ratio: 0.1207.

Coverage Evaluation

Coverage is 0%. The agent failed to load into the map; therefore, no sectors were explored, no enemies were engaged, and no items were collected. No meaningful QA data could be gathered.

Objectives Covered

- **Map launch and initial state capture:** Run status: failed.
- **Agent decision logging:** 0 decision event(s) recorded.

Objectives Omitted

- **Navigate the entire map:** Objective omitted because the map failed to load (preflight timeout).
- **Engage all enemy types encountered:** Objective omitted because the map failed to load.
- **Find secrets where accessible:** Objective omitted because the map failed to load.
- **Stress-test geometry, doors, lifts, and switches:** Objective omitted because the map failed to load.
- **Document resource balance issues:** Objective omitted because the map failed to load.

Uncovered attributes: The agent was unable to test any attributes, including standard geometry, map-specific scripting, or difficulty flag configurations, due to the engine load failure.

Defects And Risks

One defect was identified during static analysis: a difficulty-spawn mismatch where a significant number of items and enemies fail to appear at skill 1. No gameplay defects were detected because the engine failed to launch the simulation.

Patterns: Insufficient defects to identify patterns.

Severity	Priority	Type	Tick	Description
3	2	difficulty_spawn_mismatch	0	Difficulty-specific thing flags hide map content At difficulty 1, 39 of 102 enemies and 5 of 138 items from raw static analysis do not spawn in single-player because of Doom skill or multiplayer flags.

Risk Areas

- **Map Loading (Preflight):** high The map could not be loaded by the test engine, blocking all further QA verification.

Activity Log Summary

1) Static analysis phase (completed), 2) Map exploration phase (failed/skipped), 3) Combat phase (failed/skipped), 4) Defect detection phase (limited to static analysis), 5) Report generation phase (completed).
Actual activity was zero, diverging from the plan where a full map run was expected.

Limitations And Recommendations

The agent was unable to test any features due to the load error.

Good Quality Areas

- **Static context:** The report includes parsed map structure and thing counts.
