

Doom PWAD QA Report

Run 780288b5-9647-4715-b066-e868caea391c | Map E1M1 | Outcome error

Executive Summary

This is an autonomous QA test of E1M1 using an LLM agent, designed to evaluate map navigation, combat engagement, resource balance, and secret discovery. The test resulted in a critical failure due to the map engine's inability to initialize.

Pass/fail: map_navigation: FAIL combat_engagement: FAIL resource_balance: FAIL secret_coverage: FAIL
overall_verdict: FAIL

- The agent could not move as the map failed to load.
- Combat was impossible due to the map load failure.
- The agent was unable to reach any items or weapons due to the map load failure.
- Secret discovery could not be tested as the map failed to load.

A critical technical failure occurred: the map E1M1 could not be loaded by ViZDoom, resulting in a preflight timeout after 15 seconds. No simulation took place, therefore no LLM calls were made.

Test Item And Environment

The test targeted map E1M1 using the Freedoom1 IWAD at difficulty 3. The map contains 102 enemies, 138 items, 3 keys, and 7 secret sectors across a 2048x2560 unit area. Static analysis indicates a high-complexity 'hard' difficulty map with 420 total sectors and 2742 linedefs.

The environment utilized ViZDoom as the game engine, with the agent controlled by the gemini-3.1-flash-lite model via an MCP interface. The test was configured with a 500-tick cap per run.

Metric	Value	Metric	Value
Status	failed	Duration	None
Actions	0	LLM calls	0
Final HP	None	Kills	None
Position samples	0	Movement units	0.0
Recording	Not produced		

Static Analysis Context

Metric	Raw WAD	Difficulty 3	Notes
Enemies	102	74	28 hidden by skill/multiplayer flags
Items	138	133	5 hidden by skill/multiplayer flags
Secrets	7	7	Sector special 9
Geometry	2742 linedefs	420 sectors	2048 x 2560 units

Selected-difficulty estimate: hard. Health ratio: 0.0828. Ammo ratio: 0.0966.

Coverage Evaluation

Coverage is 0% as the agent could not enter the game environment. No map sectors, enemies, or secrets were accessed during the scheduled test duration. A successful load is required to provide any meaningful QA metrics.

Objectives Covered

- **Map launch and initial state capture:** Run status: failed.
- **Agent decision logging:** 0 decision event(s) recorded.

Objectives Omitted

- **All objectives:** The map failed to load, preventing the agent from interacting with the environment.

Uncovered attributes: The agent could not test any map features, including geometry, script-driven events, or combat mechanics, due to the initialization failure.

Defects And Risks

A total of one defect was detected during static analysis. The most impactful finding is a critical map loading failure which prevents all further testing.

Patterns: Insufficient defects to identify patterns.

Severity	Priority	Type	Tick	Description
3	2	difficulty_spawn_mismatch	0	Difficulty-specific thing flags hide map content At difficulty 3, 28 of 102 enemies and 5 of 138 items from raw static analysis do not spawn in single-player because of Doom skill or multiplayer flags.

Risk Areas

- **Global / Initialization:** high The map fails to load in the ViZDoom environment, representing a critical blocker for all testing and gameplay.

Activity Log Summary

1) Static analysis phase (Completed), 2) Map exploration phase (Not reached). The test ended before any ticks occurred. The activity was entirely halted by the preflight failure, preventing the transition from static analysis to active simulation.

Limitations And Recommendations

The map failed to load entirely; all features are currently unreachable.

Good Quality Areas

- **None:** No part of the map was successfully accessed or evaluated.
