

Doom PWAD QA Report

Run a3ba9534-b0a6-4d6e-804b-c14050aee345 | Map E1M1 | Outcome pwad_crash

Executive Summary

This is an autonomous QA test of E1M1 using an LLM-directed test harness, designed to evaluate map navigation, combat balance, and resource distribution. The test resulted in a total failure due to a PWAD crash during the initialization phase, preventing any gameplay execution.

Pass/fail: map_navigation: FAIL combat_engagement: LIMITED resource_balance: LIMITED secret_coverage: LIMITED

overall_verdict: FAIL

- The map did not initialize into a playable episode.
- No spawned combat state was available.
- Resource balance cannot be evaluated before runtime initialization.
- Secret coverage cannot be evaluated before runtime initialization.

The test harness encountered a fatal error during the startup phase. The ViZDoom engine could not establish a connection to the provided PWAD, resulting in an 'All connection attempts failed' runtime error. No gameplay data was captured.

Test Item And Environment

The test targeted map E1M1 using the Freedoom1 IWAD at difficulty 3. Static analysis identified 8 enemies (Imps, Zombiemen, Shotgun Guys) and 1 item (Green Armor) within a 5-sector layout. The map features a high hitscanner presence of 62.5% and is categorized as high difficulty for this skill level.

The test environment utilized the ViZDoom engine, the gemini-3.1-flash-lite LLM, and the standard automated test harness interface. The run was configured for a maximum of 100 ticks.

Metric	Value	Metric	Value
Status	failed	Duration	None
Actions	0	LLM calls	0
Final HP	None	Kills	None
Position samples	0	Movement units	0.0
Recording	Not produced		

Static Analysis Context

Metric	Raw WAD	Difficulty 3	Notes
Enemies	8	8	0 hidden by skill/multiplayer flags
Items	1	1	0 hidden by skill/multiplayer flags
Secrets	0	0	Sector special 9
Geometry	35 linedefs	5 sectors	2528 x 1056 units

Selected-difficulty estimate: hard. Health ratio: 0.0. Ammo ratio: 0.0.

Coverage Evaluation

Test coverage was nonexistent because the runtime could not initialize the PWAD. Consequently, no exploration of sectors, combat engagement, or secret discovery occurred. The results provide no data on map playability.

Objectives Covered

- **Runtime failure capture:** Client failed to connect: All connection attempts failed
- **Report artifact:** A crash report JSON/PDF was generated.
- **Defect payload:** 1 defect(s) attached to the run.

Objectives Omitted

- **All objectives:** The automated playthrough did not reach the playable map episode due to a fatal initialization crash.

Uncovered attributes: The automated playthrough could not test any map features, including navigation, combat, or geometry, due to the initialization failure.

Defects And Risks

A single critical severity defect was recorded concerning the PWAD initialization. This defect is a blocker that prevented all further automated testing.

Patterns: Insufficient defects to identify patterns.

Severity	Priority	Type	Tick	Description
1	1	pwad_crash	0	PWAD crashed or failed to initialize PWAD crashed or failed to initialize under the configured ViZDoom/Freedom test environment.

Risk Areas

- **Global/Initialization:** high The map fails to load in the ViZDoom/Freedom environment, rendering it entirely inaccessible to the test harness.

Activity Log Summary

The test run consisted only of a failed initialization attempt. No gameplay or combat phases were reached.

The planned activity flow was entirely abandoned due to the PWAD crash during the startup phase.

Limitations And Recommendations

The automated playthrough did not test any map features as the runtime was unable to initialize the episode.

Good Quality Areas

- **N/A:** No data available to assess quality.
