

Doom PWAD QA Report

Run a3fa0f8c-9cc6-4422-ad87-430208bae476 | Map E1M1 | Outcome cancelled

Executive Summary

This is an autonomous QA test of E1M1 using a lockstep LLM/MCP test harness, designed to evaluate map navigation, combat engagement, and resource distribution. The test run outcome was 'cancelled' after 149 seconds, as the runtime was unable to initialize a playable episode.

Pass/fail: map_navigation: FAIL combat_engagement: FAIL resource_balance: FAIL secret_coverage: FAIL

overall_verdict: FAIL

- The run ended with outcome 'cancelled' after visiting 0 coarse position cluster(s).
- 0 kill(s) recorded against 38 enemy/enemies that spawn at difficulty 1.
- Selected-difficulty health_ratio=0.0132, ammo_ratio=0.0386.
- 0 secret(s) found.

The test runtime could not initialize the map, resulting in a 'cancelled' status. No actions were taken, and no game ticks were recorded.

Test Item And Environment

The test targeted E1M1 using the Freedoom1 IWAD at difficulty level 1. The map contains 150 potential enemies, 120 items, and 1 secret sector, spanning 3968x2688 units with 229 sectors and 1049 linedefs. The static analysis indicates a high-density, 'slaughter-style' map complexity.

The environment utilized ViZDoom for the game engine, governed by the gemini-3.1-flash-lite LLM model via an MCP tool interface. The run was capped at 700 ticks.

Metric	Value	Metric	Value
Status	cancelled	Duration	149
Actions	0	LLM calls	0
Final HP	None	Kills	None
Position samples	0	Movement units	0.0
Recording	Not produced		

Static Analysis Context

Metric	Raw WAD	Difficulty 1	Notes
Enemies	150	38	112 hidden by skill/multiplayer flags
Items	120	46	74 hidden by skill/multiplayer flags
Secrets	1	1	Sector special 9
Geometry	1049 linedefs	229 sectors	3968 x 2688 units

Selected-difficulty estimate: slaughter. Health ratio: 0.0132. Ammo ratio: 0.0386.

Coverage Evaluation

Coverage was limited to static analysis; no active gameplay or map traversal was performed. Consequently, no meaningful QA results regarding navigation or combat mechanics could be obtained.

Objectives Covered

- **Map launch and initial state capture:** Run status: cancelled.
- **Director decision logging:** 0 decision event(s) recorded.

Objectives Omitted

- **Navigate the entire map:** Run cancelled; runtime initialization failure.
- **Engage all enemy types encountered:** Run cancelled; no gameplay occurred.
- **Find secrets where accessible:** Run cancelled; no gameplay occurred.
- **Stress-test geometry, doors, lifts, and switches:** Run cancelled; no gameplay occurred.
- **Document resource balance issues:** Run cancelled; no gameplay occurred.

Uncovered attributes: The test could not assess any runtime map attributes, including scripting, geometry traversal, or combat AI behavior, due to initialization failure.

Defects And Risks

One defect was detected during the static analysis phase prior to the runtime cancellation. This was a severity 3 difficulty-specific issue regarding item and enemy visibility flags.

Patterns: Insufficient defects to identify patterns.

Severity	Priority	Type	Tick	Description
3	2	difficulty_spawn_mismatch	0	Difficulty-specific thing flags hide map content At difficulty 1, 112 of 150 enemies and 74 of 120 items from raw static analysis do not spawn in single-player because of Doom skill or multiplayer flags.

Risk Areas

- **Global spawn flags:** medium Large portions of the map content are disabled at difficulty 1 due to flag settings, potentially misrepresenting the intended gameplay experience.

Activity Log Summary

1) Static analysis phase (completed), 2) Map initialization (failed). No gameplay or report generation phases occurred beyond static parsing.

The activity was restricted solely to the static analysis phase due to the runtime cancellation.

Limitations And Recommendations

The automated playthrough did not test any map features as it was unable to initialize.

Good Quality Areas

- **None identified:** No gameplay data was collected.
