

Doom PWAD QA Report

Run b37e67be-4ed8-4c93-897c-fa93e6b63baa | Map MAP01 | Outcome timeout

Executive Summary

This is an autonomous QA test of MAP01 using an LLM-directed test harness. The test was designed to validate navigation and map geometry, resulting in a timeout outcome after a duration of 7 seconds.

Pass/fail:

map_navigation: FAIL

combat_engagement: PASS

resource_balance: PASS

secret_coverage: FAIL

overall_verdict: PARTIAL

- The automated playthrough did not reach at least 3 distinct position clusters due to a timeout.
- The spawned_enemy_count was 0, resulting in a pass by default.
- The spawned_enemy_count was 0, resulting in a pass by default.
- Secret_sector_count is greater than 0, but 0 secrets were found.

No technical problems encountered during this test run.

Test Item And Environment

The test evaluated MAP01 using the freedoom2 IWAD on difficulty 3. The map contains no enemies, 181 items (including high-tier weaponry such as BFG9000 and Plasma Rifle), no keys, and one secret sector within a 3784x3136 unit space containing 337 linedefs and 74 sectors.

The test environment utilized the ViZDoom engine, the gemini-3.1-flash-lite model, and the MCP tool interface. The run was executed at difficulty level 3 with a max_ticks cap of 220.

Metric	Value	Metric	Value
Status	completed	Duration	7
Actions	1	LLM calls	1
Final HP	100	Kills	0
Position samples	2	Movement units	1455.3
Recording	/media/steven/MaD/matznysh-hna/Agentic-PWAD-QA-Doom/Backend/storage/recordings/b37e67be-4ed8-4c93-897c-fa93e6b63baa.mp4		

Static Analysis Context

Metric	Raw WAD	Difficulty 3	Notes
Enemies	0	0	0 hidden by skill/multiplayer flags
Items	181	181	0 hidden by skill/multiplayer flags
Secrets	1	1	Sector special 9
Geometry	337 linedefs	74 sectors	3784 x 3136 units

Selected-difficulty estimate: easy. Health ratio: 0.0. Ammo ratio: 0.0.

Coverage Evaluation

Coverage was highly limited as the automated playthrough terminated almost immediately upon initialization. Only two position samples were recorded, meaning the map's sectors and features remained largely unverified. The test run duration was insufficient to provide a meaningful QA result.

Objectives Covered

- **Map launch and initial state capture:** Run status: completed.
- **Director decision logging:** 2 decision event(s) recorded.
- **Movement telemetry:** 2 position sample(s) across 2 cluster(s).
- **Gameplay recording:** /media/steven/MaD/matznysh-hna/Agentic-PWAD-QA-Doom/Backend/storage/recordings/b37e67be-4ed8-4c93-897c-fa93e6b63baa.mp4

Objectives Omitted

- **Navigate the entire map:** Navigation incomplete due to episode timeout.
- **Engage all enemy types encountered:** No enemies present in the map data.
- **Find secrets where accessible:** Secret discovery not attempted due to premature termination.
- **Stress-test geometry, doors, lifts, and switches:** Geometry testing was not performed due to minimal movement.
- **Document resource balance issues:** Resource collection was not attempted.

Uncovered attributes: The test did not assess map-specific scripting, door functionality, or any layout-dependent interactions due to the extremely short runtime.

Defects And Risks

No defects were detected during this test run. The map passed all automated checks, though the results are limited by the premature termination of the test.

Patterns: Insufficient defects to identify patterns.

No defects are currently attached to this run.

Risk Areas

- **Progression:** Map exit was not verified; outcome was timeout.
- **Traversal coverage:** The automated playthrough visited too few coarse position clusters.

Activity Log Summary

1) Static analysis phase, 2) Map exploration phase (aborted), 3) Combat phase (N/A), 4) Defect detection phase, 5) Report generation phase. The gameplay context is confined to ticks 17-18.

Exploration was virtually non-existent due to the episode terminating immediately after the first actions were initiated.

Limitations And Recommendations

The automated playthrough did not reach any locked doors, triggers, or specific map geometry.

Good Quality Areas

- **Runtime stability:** The backend completed the run lifecycle.
- **Evidence capture:** A gameplay recording artifact was produced.
- **Static context:** The report includes parsed map structure and thing counts.
