

Doom PWAD QA Report

Purpose

This report summarizes the automated quality assurance test run for a Doom PWAD, focusing on map completion, navigation, combat engagement, resource management, and secret discovery.

Summary

A test run was performed on map E1M1 at difficulty level 3. The agent completed the map in 4 seconds, registering 1 action. During the run, no items were collected, no kills were made, and no secrets were found. The agent finished with 100 HP and 0 armor. One LLM call was utilized for agent control. There were no detected defects and one notable event occurred.

Environment

The test was executed using freedoom1 as the IWAD, with the gemini-2.5-flash LLM model controlling the agent's behavior.

Defects

No defects or error messages were recorded during this test run.
