

Doom PWAD QA Report

Purpose

To evaluate the functionality and playability of a Doom PWAD on map E1M1 through automated testing.

Summary

The automated test run on map E1M1 completed in 3 seconds at difficulty level 3. The agent successfully reached the map exit with 100 HP and 0 armor, having taken 1 action. No items were collected, no enemies were killed, and no secrets were found. There were no reported defects during the run, but 1 notable event occurred.

Environment

Testing was conducted using 'freedom1' as the IWAD. The test execution was driven by the 'gemini-2.5-flash' LLM model. The run concluded successfully without any reported errors.

Defects

No defects or errors were identified or reported during the automated test execution. The run completed successfully without any agent crashes or unexpected behaviors.
