

Doom PWAD QA Report

Purpose

PWAD Quality Assurance (QA) report based on automated agent testing for a Doom WAD file.

Summary

The test run was conducted on map E1M1 of WAD file ID e90e40b9-1f1e-49a0-a473-c91fdc069b61, using freedoom1 as the IWAD, at difficulty level 3. The run completed with an outcome of 'map_completed', lasting 2 seconds. The agent achieved 0 kills, collected 0 items, and found 0 secrets. At the conclusion, the agent had 100 HP and 0 armor. A total of 1 LLM call was made, resulting in 1 action taken by the agent.

Environment

The testing agent utilized the gemini-2.5-flash LLM model. The simulation was configured with a maximum of 5 ticks. Static analysis data for the PWAD is referenced by ID e57a5d64-ee91-4a12-b3d9-c96c298f1ef1. A recording of the test run is available at /media/steven/MaD/matznysh-hna/Agentic-PWAD-QA-Doom/Backend/storage/recordings/70f8261d-cee4-4d48-b012-d38b8ca85da0.mp4.

Defects

No defects were detected during this test run (defect count: 0). One notable event was recorded, though specific details of the event are not provided in this summary.
